

BLOODHOUND

Bloodhounds are very large, strong dogs (some are well over 100 lbs).

They are Black & Tan, Liver & Tan, or just Red. Their ears are very long.

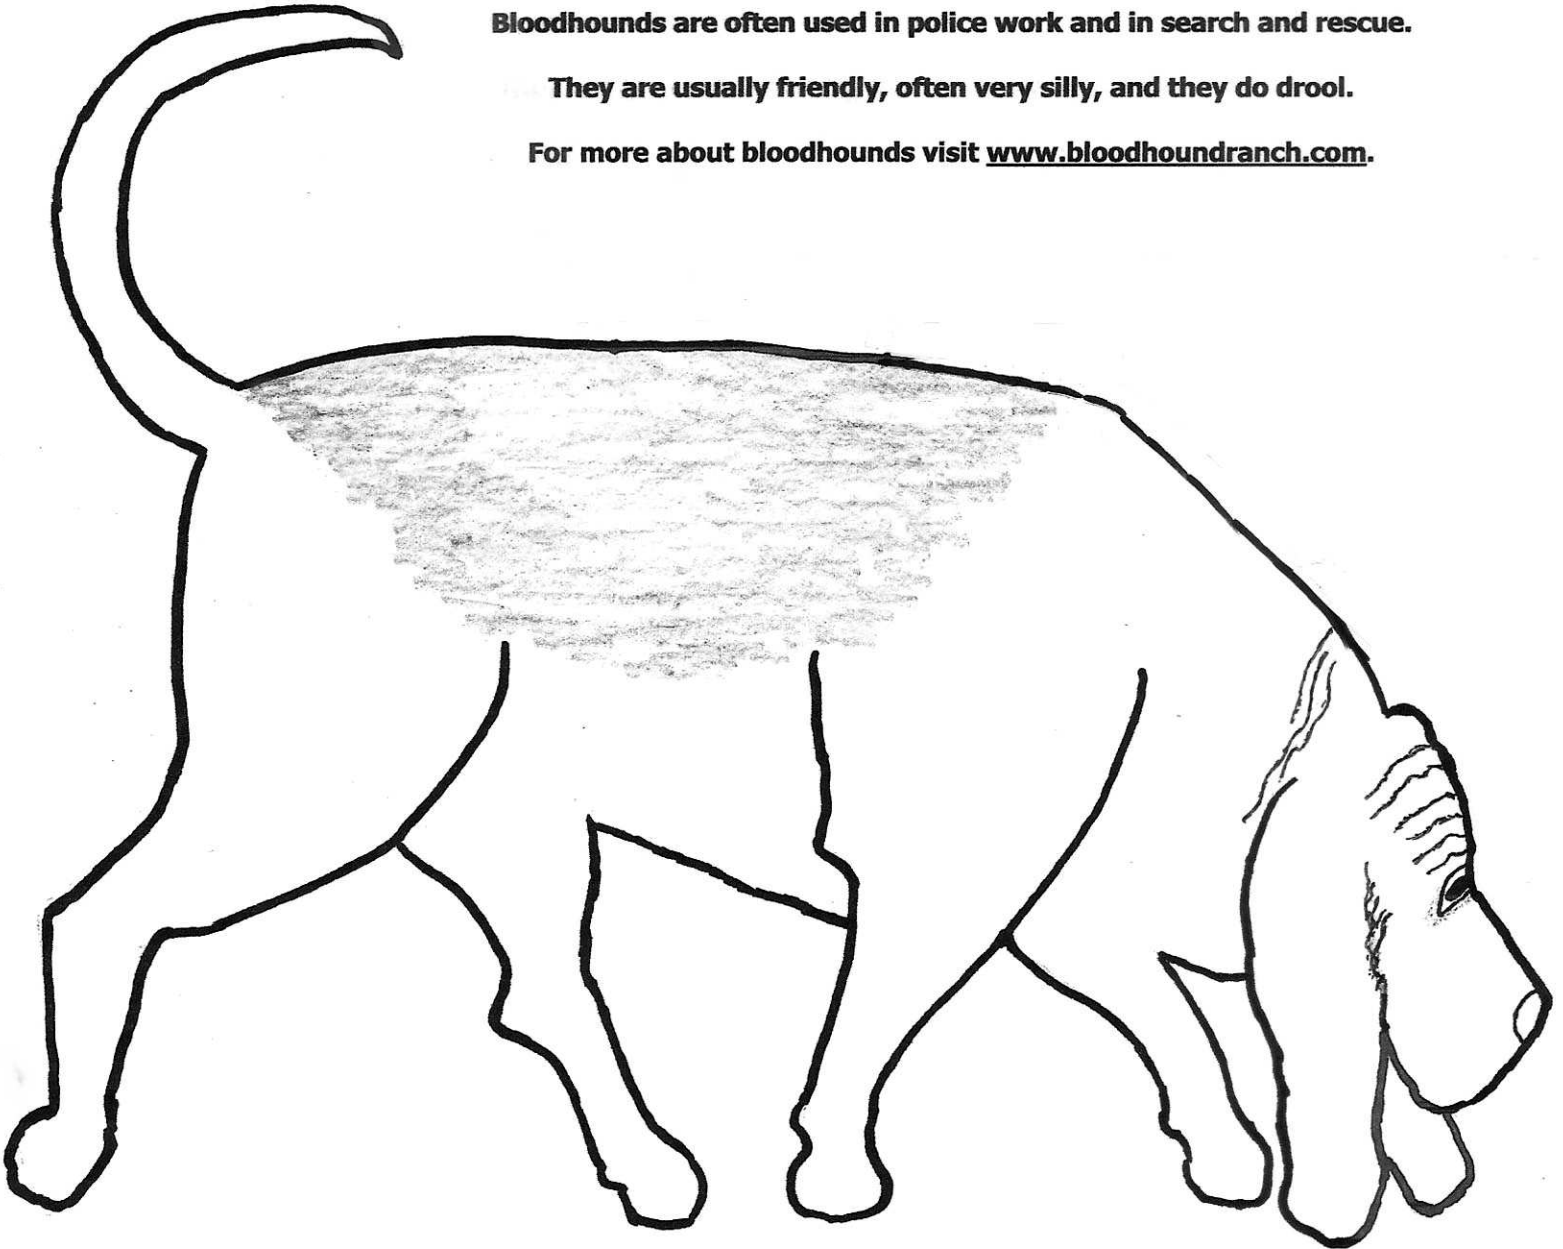

A bloodhound's best tool is their nose, which helps them to follow scents & smells.

Their skin is really loose so it folds and wrinkles around their face and neck.

Bloodhounds are often used in police work and in search and rescue.

They are usually friendly, often very silly, and they do drool.
